- Secured Global rank of **41** , **111** respectively in Starters 77 (Div 2) and Starters 92 (Div 2) among 3k+ participants.
- Secured Global rank of **216** , **416** respectively in Codeforces Round 823 (Div 2) and Codeforces Round 875 (Div 2) among 35k+ participants.
- Secured Global rank of **259** , **488** respectively in Leetcode Weekly Contest 322 and Weekly Contest 335 among 20k+ participants.
- Solved more than **1500+** problems across platforms.

Projects

Study Notion | *Node.js* , *Express.js*, *MongoDB*, *React.js* | [githublink](#)

June 2023

- StudyNotion is a fully functional ed-tech learning platform that enables users to **create**, **consume**, and **rate educational content**. Users can **sign up** and **log in** to the platform using their **email addresses and password**. The platform also supports **OTP verification** and **forgot password** functionality. It uses **Cloudinary**, a cloud-based media management service, to store and manage all media content. The platform is built using the **MERN** stack, which includes **ReactJS**, **NodeJS**, **MongoDB**, and **ExpressJS**.
- It is a versatile and intuitive platform for instructors and students where Instructors can **create**, **read**, **update**, and **delete** courses, as well as manage course content and media and Students can **purchase** and **enrol on courses** by completing the checkout flow that is followed by **Razorpay integration for payment handling** and After purchase students can **view**, **learn** and **rate** courses.

Bus Booking System | *python tkinter* , *SQLite* | [githublink](#)

November 2022

- It is a fully functional bus reservation system developed using **Tkinter (GUI)**, **SQLite**, and **Python**, This reservation system has three modules. First module helps the customer to enquire the **availability of seats** in a particular bus at particular date. Second module helps him to **reserve a ticket**. Using third module he can **cancel a reserved ticket**.
- It manages all the information about Bus, Customers, Seats. The Project is totally built at administrator end and thus only the administrator can add/delete new bus or new routes.

Portfolio | *ThreeJS*, *React Three Fiber*, *Framer Motion*, *React.js* | [githublink](#)

April 2023

- Designed and developed a impressive personal portfolio website using 3D graphics library like **ThreeJS**, **React Three Fiber**, **Framer Motion** to showcase skills, projects, and achievements..
